

Key Safes.

Avoid expensive locksmith fees and prevent property damage with a key safe.

Churches of Christ Housing Services has key safes available for tenants to purchase for **\$38.50** plus installation. Costs for Installation will vary depending on your location and type of property.

The benefits of installing your own key safe include:

- Safe and robust
- Prevents expensive locksmith fees and delays
- Avoids damage to the property
- Set your own code and change it when you like.

Key safes must be professionally installed due to risks associated with electrical wiring and water pipes located in wall cavities.

Key safes are managed like any other alteration you make to your home and you will be required to remove it and repair the wall when you leave. Alternatively, it can be left in place if you provide us with the code.

We do waive the property alterations application process for key safe installations, so no paperwork is required. You can simply contact any of our offices and request to have one installed.

The key safe and installation costs can be repaid by instalments. Contact your housing officer for more information.

Easy to Use.

Enter code.

Get keys.

Open door.

Return keys.
